ACCUWEIGH

COMPLETE BUDPAK BAGGING AND PALLETISING SYSTEM FOR SALE

The complete system comprises:

- Loading hopper with inclined product transfer conveyor
- Twin-head (Dendy) vibratory fed gross weigh bagging scales
- Bag closing conveyor
- Bag sewing station with Newlong sewing machine
- Bag turning conveyor
- Bag elevating / flattener conveyor
- Bag pick-up conveyor
- Fuji-Ace EC-101 robot palletiser with dust jacket
- Pallet dispenser
- Slip sheet applicator
- Loading station conveyor
- Filled pallet accumulation conveyor
- Safety fencing
- Control system

CONDITION

The robot palletising system was installed in November 2002 at a well-known business supplying landscaping and building material products. The Fuji-Ace model EC-101 robot palletiser is a current model, hence spare parts are readily availability. Fuji is recognised as a leading robot manufacturer, and has well over 7000 palletising robots in operation around the world.

The loading hopper, product transfer conveyor, and twin-head vibratory fed gross baggers were supplied by others.

All other equipment designed and manufactured by Bud-Pak in Newcastle. Bud-Pak systems are renowned for their rugged design, reliability and long-term service. Wherever possible the equipment comprises off-the-shelf standard Australian (and New Zealand) parts, such as SEW gearmotors, Allen-Bradley, SMC, Sick, and Sprecher+Schuh electrical and pneumatic components.

PRICE

Asking price is AUD\$ 90,000.00 (ex GST) for the complete bagging and palletising system. Note the bagging equipment and robot palletising line can be sold separately if requested.

Installation and commissioning is available.
